

Quality Control Specialist

CIF Construction is a premium heavy civil contractor specializing in concrete and earthworks, delivering high quality projects for a range of industries including mining, oil & gas, forestry, and energy. We are looking for a Quality Control Specialist interested in working on remote job sites across Western Canada. This position often requires the incumbent to travel long distances, stay in camp & work a 14 on/14 off, 10-12 hour/day rotation.

Our on-site Quality Control Specialists spend the day playing a crucial role in our projects inspecting materials, monitoring construction processes, and ensuring compliance with project specifications, codes, and industry standards.

The Quality Control Specialist will:

- Review project plans, specifications, and drawings to understand quality requirements.
- Develop and maintain project specific procedures and work instructions.
- Conduct regular site inspections to verify compliance with project specifications and quality standards.
- Perform or oversee material testing to ensure they meet required specifications.
- Identify, document, and report non-conforming work or materials.
- Initiate non-conformance reports when required.
- Maintain accurate records of inspections, tests, and construction activities.
- Prepare and submit daily/weekly quality control reports to the project manager.
- Track and resolve quality-related issues and maintain corrective action logs.
- Ensure all construction activities comply with local, state, and federal regulations, building codes, and safety standards.
- Collaborate with project management, contractors, suppliers, engineers, and clients to resolve quality-related issues.
- Serve as the primary point of contact for quality control concerns and communicate findings effectively.

For this position you come equipped with:

- Bachelor's degree in engineering, or a Red Seal trade certificate in carpentry or ironwork are preferred, Engineering Technology Diploma or equivalent with a combination of experience will be considered
- Relevant certifications are an asset
- 3+ years in heavy construction or related field
- Familiarity with construction materials, methods, and best practices
- Proficiency in quality management software and tools
- Ability to read and interpret construction plans and technical documents
- Knowledge of OSHA standards, safety protocols, and a commitment to working safely

And have strong skills in:

- Analytics
- Attention to detail
- Communication
- Relationship management
- Reporting
- Time & priority management

Working with CIF is an opportunity to combine professional growth with personal fulfillment. Employees benefit from a healthy work-life balance with flexible time off and rewarding compensation that includes RSP contributions & competitive health benefits. We support a culture that prioritizes working safely to ensure everyone can enjoy days off with those most important to them. As an established company with over 30 years of success, CIF offers a stable and trusted workplace with low turnover, thanks to its dedicated team of long-standing employees. Working with us also means the chance to experience some of Canada's most incredible landscapes. If the role and what we offer is what you're looking for, please send a cover letter and resume to **jobs@cifcon.com**

The rate range for this position is: \$40.59 to \$53.65 per hour
